## Fund Management Commentary

The LOYS Global came through October a little exciting, albeit with a positive undertone. All in all, the past four weeks have been dominated by the companies' quarterly reports. The picture was mixed: Microsoft and Facebook were convincing among the stock market giants Microsoft, Apple, Alphabet, Amazon, Facebook and Netflix, while the development of Google, Apple and Netflix slowed down. So far, companies from the manufacturing industry have been conspicuously weak. In the USA, the Fed lowered key interest rates for the third time this year. The LOYS Global is now approaching the end of the year with comparatively high investments.

**Important Information:**

<sup>1</sup>The gross value development (BVI method) takes into account all costs incurred at fund level (for example, the management fee) with the exception of any front-end load that may be incurred (this is otherwise marked separately). Additional costs may be incurred individually at customer level (e.g. custody account fees, commissions and other fees). Model calculation (net): One investor would like to purchase units for EUR 1000. With a maximum initial sales charge of 5%, he or she must spend a one-off of EUR 50. Additionally, custody account costs may be incurred which affect the performance of the portfolio reduce the deposit costs. The custody account costs result from the price and service list of your Bank. Historical performance is not a reliable indicator of future performance. Especially performance results referring to a period of less than twelve months (Year-to-date-performance, start of investment fund within the last twelve months) does not reliably indicate future results due to the short period of comparison. Hence, the future performance of the investment cannot be guaranteed.
